

Figura 1: Conjunto  $S_n$  — Geometria do Problema de Retas Ensolaradas

Legenda

$S_n = \{(a,b): a+b \leq n+1\}$

Nao-ensolarada ( $y = cte$ )

Ensolarada ( $m \notin \{0, \infty, -1\}$ )

Anti-diagonal ( $x+y = cte$ )

Ponto  $(a,b) \in S_n$

$|S_n| = 10 \text{ pontos} \cdot n = 4$

$k_{\max} = \lfloor 7/3 \rfloor = 2$

Formula Fundamental

$k_{\max} = \lfloor (2n - 1) / 3 \rfloor$

Regiao valida:  $0 \leq k \leq k_{\max}, n \geq 3$
